[p. 202(c)]

121 living rarely encountered in the modern world. As will be shown later, however, the island people maintain their simple but not uncomfortable way of
[433] living only by help from outside: if one believes that every inhabited area must make its economic contribution to the state, Inishbofin is a debtor on a considerable scale.

"A small and dwindling population
167 maintain a precarious existence on the
● 657 Atlantic fringe of our industrial society and present upon the whole an aspect of decline and, in some parts, of derelic-
[659] tion." In these words the Scottish crofting report[1] names a problem, common alike to the Atlantic fringe of Ireland and of Scotland, which was investigated by two Congested Districts Boards, in Ireland from 1891–1923[2] and in Scotland from 1897–1911[3]; in both countries the powers of these boards were transferred to the general administration of agricultural affairs. One by one the islands off the west coast of Ireland are being abandoned[4] but on Inishbofin this prospect does not seem immediate: past and present government assistance has resulted in a planned

[113] [1] Department of Agriculture for Scotland, Report of the Commission of enquiry into crofting conditions. H.M.S.O., Edinburgh, 1954, Cmd. 9091, para. 281, p. 87.

167 landscape combined with financial help of such varied forms that one may see ●657 the welfare state in action. Inishbofin, four miles beyond the coast of Connemara [131] (10° 10′ W. to 10° 15′ W.), is separated by a strait almost one mile wide from the nearest inhabited island, Inishark. Some of the neighboring 311 small uninhabited islands are useful sheep pastures and others merely reefs 132 dangerous to shipping. In calm weather these islands rise above deep clear waters, but in storms Atlantic waves send spray to a height of 300 feet and more[5] and a dangerous swell sweeps through intricate channels. The inhabitants, farmers and farmer-fishermen are at the mercy of the weather. In 1954 the dry spring resulted in a short growth of oats and barley straw and a feeble growth of potatoes; the fishermen's lobster pots were swept out to sea, replaced and then swept out again; and the hookers could not be taken out in waters always dangerous but vastly more so when the weather consists of an apparently endless series of deep depressions.

505 Isolation is a major problem, but on four days a week in summer and three days a week in winter a hooker runs from the pier at Cleggan to the island, where it is rarely able to berth at the pier, so that all passengers and goods must be put over the side into a curragh and rowed ashore. In winter the island may be storm-bound for as much as a fortnight at a time, and almost [261] every household has a bag of meal kept for such an emergency. Special arrangements have to be made for the shipment of cattle; fish can be taken for sale to the mainland in rowing boats only during favorable weather; and no eggs are sold owing to transport problems [137]

[5] On the cliffs of the island the vegetation is halophytic and consists generally of a low sward of seapink (*Psamma maritima*).

[p. 203(A)]

000 problems. The range of commodities
433 available on the island is restricted. But the farms are similar to those in Connemara, and the fishing—especially for lobsters—may in some years be distinctly profitable. Peat is still available and no coal is imported. Once the peat is used up, it is hard to maintain existence on these remote islands. And if the population diminishes to very small numbers, its very maintenance may become precarious or impossible as on Inishark (p. 208). Inishbofin's present population is maintained partly
434 by the help of various government
● 657 schemes, by the remittances of relatives,
167 or—in comparatively few instances—by periodic spells of residence in England to make money as laborers or domestic servants. Incidentally, the
[191] people are entirely English-speaking: the Irish speech was lost almost 60 years ago.

291 Home spinning and weaving of fab-
438 rics is now extinct. In 1893, it was noted that most of the clothing was
[286] made from "homespun and home-dyed woollen fabrics" but that "imported shop clothes of inferior quality" were replacing them.[8] Inishbofin people have no longer the homespun clothes still worn by the people of the Aran islands in Galway Bay: only one old woman was seen in the traditional red skirt (or petticoat) dyed with imported madder. Clothes are now bought in the local shops, or during occasional visits to Clifden, which is "town" to the islanders, or to Galway, or from mail order houses in Dublin. Even a journey
484 to Clifden involves seven miles in a hooker and seven miles along a road with no public conveyance, and Galway
[497] is a further 50 miles by bus as the light railway was closed in 1925.

311 bor, and then with no break to Cloon-
amore on the east side.

This island has a planned landscape.
311 The roads of the commonage pastures
● 657 and peat bogs have been built under
relief schemes and the farms include
seven acres of improved land, "striped"
or defined by the Congested Districts
Board after the land was acquired from
its owner, Mr. C. Allies, in 1907.[10]
342 Since then new houses of concrete, with
511 a concrete floor, roofed with asbestos
657 slate or, rarely, ordinary slates, have

[10] Congested Districts Board for Ireland, 18th report for the year ending March 31, 1909, Cmd. 4927, p. 139. The price paid was £8301, including £401 for tenants' interests. Up to March 31, 1915, £7047 was spent on the island, 23rd report, 1915, Cmd. 8076.

342 been built for almost the entire popula-
511 tion. In 1893 it was said that there
[657] were no outbuildings or cattle-sheds, so that peat was stacked in a corner of the cottage with the fowls roosting on it, the pigs in a pen beside the fireplace, the cattle in a pen at the other end of the room, and the farm implements and fishing tackle in the rafters.[11] Now the
[343] old houses are the outbuildings, still thatched, with oat straw (not rye as formerly) laid on sods and tied down with home-made straw ropes weighted with large stones. Only five thatched houses were still inhabited in 1954. Some of the thatch has sprouting oats and some of it is rotten, but, when a roof is beyond further repair, it is all stripped off and the sodding and thatching begins again. Happily, corrugated iron is not used as it cannot stand the weather.

Farming

241 Agricultural practice is almost uniform: an acre or so is divided between oats, potatoes, and—in a few cases—barley, and there is generally a small patch of turnips, mangolds, and, less frequently, cabbage (Fig. 2). Onions, carrots, and parsnips were rarely seen. The ground used for crops is called the "garden," and its fertility is maintained by using animal manure and seaweed, and also by rotating the crops. Strange (or "foreign") seed is favored, and
[657] bought at a cheap rate under a government scheme. The remainder of the farmstead consists of a varying amount of meadow, generally 1–3 acres, and some pasture. The precious crops are
[231] carefully walled, but some of the farmers open their fields to the cattle and sheep after the harvest, partly as a
231 means of natural fertilizing.
439 Each farmer has one or two cows and

Inishbofin

[961] sixteen are in a similarly formless cluster.

167 Emigration has entered deeply into the fabric of life: in 1841, Inishbofin
161 with Inishark had 1612 people, but ten years later there were only 1047. A rise to 1236 in 1861 and 1262 in 1871 was followed by a drop to 997 in 1891, when there were 215 families of whom one-quarter were said to be "very poor."[18] Steadily the population declined, to 510 in 1936, 406 in 1946, and 341 in 1951, and now less than 300 (including 40 in Inishark). One-quarter of the families were interviewed in 1954; of these only one-third were "normal families" of parents with children. In the school there were only 29 children aged 5-14, whereas the normal figure would be 48. On Inishark there are now only nine able-bodied men, six of whom are needed to man a boat seaworthy in winter, with the result that an epidemic might be disastrous. Permanent emigration to Britain, or, if possible, to America, is favored by the young and adventurous. Even in 1893 seasonal emigration to Britain as harvesters or domestics was declining,[19] though a number of people went to America for several years, saved money, and returned to the islands. A large proportion of the people have spent several years in the United States. In many cases a family has its older relatives in America, its younger ones in Britain.

Conclusion

● 657 Having reviewed the economic geography of this island certain conclusions emerge. First, the present relative comfort of the population has been made possible only by past and present government assistance bestowed with lib-

[113] [18] Congested Districts Board, Base Line Reports, Clifden district, 1891.
[19] C. R. Browne, *op. cit.*, p. 353.

[p.208(B)]

●657 erality. Houses, farms more than twice the size of those normal before the days of the Congested Districts Board, doles to those needing them from November to April, subsidized schemes of building walls that seem in places scarcely necessary, and no direct taxation—all contribute to the general social welfare. In addition the family allowances and old age pensions help in many households, but these are general state benefits. During the winter many householders are short of money, once the money for the stock has been spent.[20]

167 Second, emigration has been of vast benefit to the community; money comes
434 in to most of the homes from America[21] or Britain, or both. And emigration has made possible the making of farms which, with the use of commonage, can hardly support a family in comfort but can give basic sustenance; though, as more and more farms are united, some men will prosper, especially those who fish as well as farm.

443 Third, it is regrettable that the lack of commercial facilities means that eggs,
489 poultry, butter, and other produce cannot be sold; in many parts of Ireland the sale of eggs to grocers and milk to

[273] [20] The consumption of stout at the only inn averages eight barrels a week in summer, but only
[804] three barrels a week in winter. The standard content of a barrel is 256 pints.

The Land and the Sea

Standard of Living

THE STANDARD OF LIVING of the folk has improved vastly since the establishment of the Irish Land Commission in 1881 and the Congested Districts Board ten years later, and the islanders are better off today than the inhabitants of some other areas of the Gaeltacht. In 1891, the Congested Districts were delineated as regions in which the population did not possess sufficient land to maintain life except at an extremely low standard. Between that year and 1951, the population in the districts declined 42 percent—from 541,000 to 367,000 persons. The few areas which would rank as congested now, on the 1891 basis, are mainly in Cos. Donegal, Mayo, and Galway (Freeman 1960:121–123). A vigorous and continuing effort to stem the tide of emigration, in part caused by poverty, led the commission, the board, subsequently the Gaeltacht Eireann which replaced the board after 1925, and other government agencies appointed in this century, to improve the standard of living by various actions: the enlargement of land holdings for more effective farming, the encouragement of small factory and domestic industries, the improvement of fishing, the construction of public works, and the introduction of various subsidies. Seasonal laboring in England, often practiced out of necessity by mainland farmers but not by the islanders, and remittances from relatives who have emigrated are income sources which also have served to alleviate poverty; but the major palliative throughout Ireland has been emigration. One of the factors limiting migration from Inis Beag to the mainland until recent decades was the low standard of living which prevailed in the country at large. An islander could not escape local hardships and privations by emigrating to urban centers as he can today; he had to turn his back on Ireland.

Most Inis Beag people believe themselves to be materially poor, although they resent others agreeing publicly with this view. A well-known Dublin newspaper feature writer in 1963 was denounced, and a vow made not to permit him to

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

511
829 come ashore in the future, for his use of the term poverty when describing Inis Beag life in a series of articles. The islanders, however, constantly complain of their indigence privately and deprecate it and are embarrassed by it in the presence of strangers. Girls and young women are particularly disparaging, and elders are puzzled by this attitude because the lot of youth is so much easier than was that of their mothers and grandmothers. Those persons who extol island existence usually do so in a defensive manner; after conceding that goods are in short supply, albeit "no one suffers from want of food or clothing," they go on to stress the healthy climate of the island, the freedom and independence that they enjoy, the sanctity of Inis Beag and its many saints of the past, and the strength of Catholic belief. Sometimes the advocate is followed by a denunciation of urban life, where these essential characteristics are lacking, or by a recounting of the difficulties being encountered by a relative just arrived in Boston or London.

433
241
233 The subsistence economy of Inis Beag always has been dominated by agricultural pursuits, contrary to frequent assertions by writers that farming was subsidiary to fishing two generations ago. Most householders own land on which they grow potatoes and other vegetables, grass, and sometimes sally rods, and where they pasture cattle, sheep, goats, horses, and asses. Potatoes are the staple crop, and after they are harvested the land usually is seeded with grass and used as pasturage for a number of years before being replanted. Indigenous soils bearing grass at the back of the island also serve as pasturage, and horses and asses at times are permitted to roam the trails and common land to forage whatever they can [262] from the meager flora there. Supplementing potatoes in the diet are various vegetables, milk from cows and nanny goats, meat from island sheep and poultry, [342] fish, and other foods, many of which are imported and sold in the shops. Rye is [343] grown for thatching houses and contiguous outbuildings, as well as barns located [493] south of the terrace crest, and sally rods are used to weave several types of containers. The only vehicles in Inis Beag are three two-wheeled carts employed to transport heavy loads, such as building stones, along the rough and narrow trails. Most householders own asses or horses, often ridden, which carry burdens in baskets
433 or pull carts. Other subsistence activities are knitting, weaving, crocheting, tailoring,
28 shoemaking, and net making, although the last skill almost has died out.

433
[437] A slowly expanding cash economy features the export of cattle and sheep reared or fattened in the island and of surplus potatoes, the collection of seaweed for extraction of its iodine content at a mainland factory, the manufacture of [28] craft objects, and the keeping of tourists in private homes. Among the craft commodities produced are cable-knit sweaters, miniature *curach*, stockings knitted at the local factory in the coast guard station, and articles of clothing worn by the folk—woven belts, cowhide shoes, and shawls. These goods are sold both to visitors [657] and to middlemen who resell them in Ireland and export them abroad. The cash economy is buttressed considerably by government subsidies of many sorts and [651] by remittances from emigrant kin. Not only are income and property taxes not [429] collected in Inis Beag, but rents are extremely low, both of which conditions rep- [124] resent indirect government subsidization. Income information is as difficult to come by as data concerning pagan supernatural beliefs, disputes, and sexual atti-

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

complain about how difficult their new work regime is when compared to the old. Young men are chided by their elders, as well as by their wives, about how much less they labor today than did their forerunners and womenfolk. One of the most popular conversational themes among old men is the contrast between generations—how much stronger and more industrious those of the "hero breed" (a term favored by Mullen [1936] in describing Irish islanders of the past) living half a century ago were than men are nowadays. Women are provoked by how vociferously their spouses complain of the difficulty and endlessness of their labor, and yet how little initiative and industry they exhibit and how often they are idle. "Light work" or no work at all is customary on days when the steamer calls, when it rains heavily, on the day an islander dies and two days afterward, on Sundays and holydays of obligation, and at other times, contrary to the state of affairs which prevailed in the past.

Several men admitted to me their guilt about not working more often and energetically, and told me that many of their fellows "talk big" but do not match their words with deeds. All of them questioned the need for maintaining traditional patterns of labor in light of the many supports to the economy provided by the government. One candid islander suggested that a factory be constructed in Inis Beag which would employ all of the men two to four hours each morning—"Then people would have a steady income and a lot of time off. Now it is hard to get up in the morning and decide what to do, and by noon you are just reaching a decision." An even franker man, of the oldest generation, was unwilling to agree with his peers about how hard they had worked when young. He was willing to acknowledge that now "times are easier," but that when he was a youth men often were idle and were chided by their elders and felt guilty. Interestingly, he was aware of the phenomenon of primitivism, which he described as "the romantic notions writers have about us."

Land Ownership

Inis Beag comprises a townland of four 256-acre quarters, called "carrows." Other land units are the half-quarter, the "cartron" of 64 acres, the half-cartron, the fourth or "croggery" of 16 acres, the half-croggery, the acre, and the three-quarter, half-, and quarter-acre. I have mentioned already that the total acreage of the island is 1440, the strand and common land together make up 200 acres, and the initial division of land among the local inhabitants probably was accomplished by a landlord late in the seventeenth century. Approximately 1000 acres are owned by the Irish Land Commission today and rented to 57 landholders, while two other properties have been purchased from the commission and thus are owned privately. The acreage not accounted for represents shore areas which are useless for agricultural and grazing purposes. Rent is charged according to the fourth and is 5 shillings[1] per year at the present time.

The quarters of Inis Beag extend southward in roughly parallel fashion from the four villages, and each landholder possesses numerous fields, ranging in

[1] A shilling is the equivalent of 14 cents and a pound $2.80 in United States currency.

16:Messenger E-4,5 (1955-1960) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

underclothing retained. The latter practice reflects extreme modesty as well as the need for warmth. Islanders have an obsessive fear of nakedness which permits them, after infancy, to bathe only their feet, hands, and face and precludes bathing in the sea and the use of bathtubs.

Crafts

Of the several crafts practiced in Inis Beag, only three are strictly income instead of combined subsistence-income activities: the manufacture of *curach* by four men, the mass production of stockings by four girls in the factory at the coast guard station, and the fashioning of miniature canoes by a single man. Sweaters, woven belts, cowhide shoes, and the small multi-colored shawls are made both for local wear and for export. Most of the exported sweaters are sold to a particular mainland firm for resale, as are all of the model canoes, and the factory is sponsored by Gaeltacht Eireann which markets the stockings produced. Other craft commodities are sold by the folk directly to consumers, most of whom are tourists.

The long rowing canoe of Inis Beag is distributed widely along the west coast of Ireland, from Cos. Donegal to Kerry, and its seaworthy qualities as well as the rowing skill of the crews which sail it are renowned. One of a number of varieties of the coracle, which has a heritage extending back to the Mesolithic, it is built of deal and oak lathes and covered with tarred canvas (see Fig 10). Before canvas was introduced, untanned seal, cow, and horse hides were used for covering, and these were reported from a nearby island less than 100 years ago. The *curach* is approximately 20 feet in length, has a high pointed nose, is round bellied and lacks a keel, draws less than 6 inches of water, and is rowed with narrow 10-feet-long oars. These oars are bladeless for use in rough seas and are pivoted on single tholepins rather than in oarlocks. The looms of the oars overlap, so that oarsmen must pull cross-handed, and on long journeys a lug sail is hoisted to relieve the crew. For the neophyte, rowing a *curach* cross-handed in a heavy sea can be even more abusive of the hands than rebuilding a gateway in a stone fence. Most canoes hold three men—are "three-oared"—but two-, four-, and even five-men *curach* were or are used. Loads up to a ton and a half can be accommodated, and trussed asses, sheep, and horses sometimes are transported in them.

Forty-two householders in Inis Beag own three-men canoes, among whom three have additional two-oared *curach*. The craft are stored upside down in "cots" on either side of the strand along the margins of the common land, although Terrace villagers use a small beach along the northeast coast of the island; they are carried between the cots and the water upside down on the shoulders of the crew, and in that position resemble gigantic beetles. Two Inis Beag men are at work building canoes most of the time, and when they are not busy at this task they construct furniture for local sale. Two other men manufacture *curach* occasionally, and another two who once built them have discontinued the practice. No canoe makers are found elsewhere in the region; therefore, Inis Beag artisans serve the

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

The knit sweater called a "ganzie," is not a traditional item of wear, as is commonly asserted by writers, but was introduced in the 1890s as a cottage industry by the Congested Districts Board, which sent instructors to Inis Beag to teach the women there the manner of knitting the intricate patterns. Only children wear the ganzie, for men always have preferred a dark sweater of simple design which is indigenous to the island. The patterns bear such euphonious names as "crooked road," "figure eight," "double diamond," "rosebud," "honeycomb," and "blackberry," and most of them are common to the rest of Ireland, the British Isles, and other parts of Europe. The term ganzie, in fact, undoubtedly derives from the Channel island, Guernsey. A widely held belief that each Inis Beag family has its own distinctive sweater pattern, comparable to the Scottish tartan, by which its drowned members are identified is unfounded. Seventeen women knit for the mainland company, which supplies them with yarn, and are paid between 2 pounds and 2 pounds and 10 shillings by weight for each sweater. Some are able to knit a ganzie in a week, but others take two or three weeks; one woman made 41 sweaters during 1959. A girl working steadily at the knitting factory can earn slightly more in a week than one knitting a ganzie in that time, but most girls choose to knit sweaters because they can be at home where their task seems less tedious. Some women prefer to sell their sweaters to tourists and can on occasion dispose of a ganzie for as much as 6 pounds, but these women must purchase their own yarn, and marketing is much less secure as tourists seldom come into island homes. At present, the finest ganzies are knitted by women in Co. Donegal, a fact which Inis Beag women admit privately.

The woven belt and cowhide shoes of Inis Beag folk have an ancient heritage, just as has the *curach*. It is not known when the belt, or *crios*, was introduced into Ireland, but it has been worn for centuries by Portuguese seamen. Known as "pampooties," the island style footwear once was worn widely in Ireland, although made from various hides and skins, and a century ago was cut from sealskin in Inis Beag. The term pampootie is of Scandinavian origin, and my wife and I have heard it used among Danish peasants to describe their shoes. Today, a Danish expatriate who has lived in the island for almost a decade supports himself by weaving *crios* on a loom for the folk; he also sells them to visitors and to mainland shops along with woven ties and bookmarks. Although "the Dane" has come to monopolize the production of belts, several women occasionally make them by hand for their menfolk and to sell. The manufacture of *crios* once was largely in the hands of women, and they wore them sewn to their petticoats and tied at the side, but now it is mostly men who wear them. Three yards long and two inches wide, the belt is woven with a multitude of colors and designs and is worn wrapped twice around the body and tucked in at either side of the waist. Elders prefer traditional designs and shun the color green because it is unlucky, but young men are coming to like experimental patterns and all of the basic colors and their many shades. Contrary to popular opinion, there are no family designs. Some persons, however, ask for the same pattern every two or three years when they buy a new *crios* if they believe that it has brought them luck.

Pampooties are favored in Inis Beag because they are ideally suited for wet rocks and frail canoes. The spiked heels of female tourists and visiting emigrants who come ashore in *curach* are viewed with trepidation by crewmen, who are sup-

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

It is not the formal system of local and national governments which exerts the most control over the behavior of Inis Beag islanders, but rather the church whose clerical representatives impose supernatural sanctions more potent than the threat of extermination. Indeed, because of the marked theocratic tendencies of the church in the Republic, and the all-powerful political role played by the clergy in Inis Beag, it is tempting to label the church a formal agency of social control. The island certainly comprises a primary group in the sociological sense, with its diminutive size and population, and the sanctions imposed by the folk on one another sometimes rival in effectiveness those of the parish priest and curate.

The widespread peasant trait of dependence together with hostility toward government is most pronounced in Inis Beag. Aid in a variety of forms constantly is sought and even expected as an obligation, or "right," of the government by the islanders (especially since nativism engendered by the Gaelic Revival has made Inis Beag "the darling of the Gaeltacht," to quote a Dublin scholar who is a bitter foe of the language movement), but they are either apathetic or antagonistic toward the local and central governments. When asked to account for their anti-government sentiment, the folk of Inis Beag cite most often the commonplace nepotism and corruption practiced by functionaries, the slight differences between the platforms of the major Irish parties—Fianna Fail and Fine Gael, the promises made by politicians which seldom are kept when they achieve office, the misapplication of programs once implemented, the inadequacy of government services, the burden of increasing taxation and inflation, and "foolish" government projects in Inis Beag, more often than not instituted without consulting the islanders.

Today, the folk seldom pay heed to election promises, but once their votes were commanded by politicians who put forth grandiose plans for the betterment of local conditions—such as lengthening the present jetty or constructing another to accommodate the steamer, and connecting the fresh water lake with the sea to form a sheltered harbor for trawlers—which never were realized. Popular subjects of conversation are the shortcomings of the postal, medical, transport, and other services, and the steady increase of taxes—on stout and tobacco in particular—and the price of imported turf. Among the government projects criticized by the islanders are seaweed drying structures and lime kilns which seldom or never have been used, road improvements made where they were not needed and not made where they were needed, and the new school and jetty whose sites were misplaced by civil servants who failed to seek local advice as to the vagaries of wind and tide. The school is in danger of becoming inundated with sand from the common land, and is near the strand where activities distract the attention of the pupils; and the pier is not located in the most protected position that the coastline affords. Anti-government feeling is but a part of a much broader anti-authority configuration, which extends to the clergy, to high status folk, and even to parent-child and sibling relationships within the family. It has been for many centuries a component of Irish basic personality structure and has had momentous repercussions on the course of Irish history.

The political apathy of the islanders is revealed in their voting behavior and their knowledge of political figures and issues. Election of councillors to the county council takes place every two years, and election of members to the Dail

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

unlicensed dogs, or when they discover a still on the mainland and arrest the "poor creatures" who were manufacturing "poteen" (illicit whiskey). They sometimes are called "peelers" in reference, a derogatory term assigned to their predecessors, the Royal Irish Constabulary, founded by Sir Robert Peel. (The Irish chose his surname to immortalize and the English his Christian name—"bobbie.") Seven verses of my ballad satirize the much resented role of the police during the aftermath of the shipwreck. The absence of guards in Inis Beag means that the pubs can stay open after legal hours, sometimes until two or three o'clock in the morning; and in the island where the police are stationed, one must enter the pubs after hours, if permitted, by the back door and drink sitting on the floor.

The *Guide to the Social Services*, published by the Dublin Stationary Office in 1959, lists under 76 headings the multitudinous services and subsidies provided the Irish people by local and central governments. Among the most important to Inis Beag folk are: Widow's Pension, Old Age Pension (called "the old age"), Unemployment Assistance (know as "the dole"), Children's Allowances, General Medical Services, General Institutional and Specialist Services, Mental Treatment, Disabled Persons Maintenance Allowances, Maternity and Infant Services, Free School Books in National Schools, Employment and Special Emergency Schemes (which include road improvement), Agricultural Education, Schemes of Agricultural Development, Gaeltacht Eireann Schemes (which include housing and language subsidies), Private Housing Grants and Loans, Local Authority Housing, and Land Commission Housing. Most of these programs are handled by civil servants who visit Inis Beag from a nearby island or the mainland, and at any time during the year there is usually at least one government agent conducting his business in the island. The services and subsidies are welcomed by the folk even though seldom considered adequate, and only one arouses bitter antagonism: elders dislike the law which requires them to will their land at age 70 before they can go on the old age, as well as the probing of functionaries who request personal information of potential old age pensioners, especially information about remittance monies which might disqualify the applicants. Almost all of the islanders are on the dole, and few express outwardly embarrassment or shame as regards the fact —"The government has a right to give us the dole."

Informal Social Control

The informal social control system of Inis Beag comprises the parish priest and curate, the headmaster of the school—chosen and strictly regulated by the parish priest, and a "king." The position of king is not hereditary and not supported by a majority of the population as in some other Irish islands, but is self-assumed and based on a number of factors to be considered shortly. Not only is king strictly a term of reference, but it is employed by the folk only when they are most critical of his actions; it also is used by certain outsiders who are frequent visitors to Inis Beag and are aware of the power structure there, but always out of earshot of the islanders.

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

624 partners to come to Inis Beag to confer with him, knowing that they were ill with
556 influenza, which resulted in a serious outbreak of the disease shortly afterward. A
[793] fire which broke out in a storage room next to the house of the king some months
[73] after the shipwreck was viewed by irate islanders as divine retribution for his "greed and selfishness."

624 In Ireland, the term "gombeen" is used to demean the usurious shopkeeper,
444 but this word is directed against the king only by those who most dislike him, and
275 then to connote what they consider a combination of piety and avarice in his behavior rather than his economic practices. His role as moral guardian, with frequent instruction and reprimand as to manners and misdemeanors to men in the pub and children visiting the shop, is deeply resented by many. He does not care to have women make purchases in the shop, where they can observe men drinking and be observed in turn, ostensibly on moral grounds; he urges that children do the marketing instead, not for the convenience of their mothers, it is said, but because he can overcharge and short-change them more easily. To dissuade women from shopping, he reads out their lists and talks with them about family affairs in a loud whisper, so that they have no privacy. The men complain not only of his alleged practice of overcharging and short-changing them late at night when the pub is overcrowded with "light headed" drinkers, but also of his criticizing their actions in public, his frequent closing of the pub before midnight, and his refusal to serve those whom he feels have "taken too much" or those about to attend a party where more drinks will be proffered them.

624 Supporters of Fine Gael and Labour, among others, object to the manner in
664 which the king curries the favor of Fianna Fail representatives and campaigns for
666 the party. He is accused of using illegal tactics, such as haranguing voters outside of the school as they enter to cast their ballots, in his endeavor to keep Fianna Fail
624 in power. A more serious charge related to this one is his opposition to change in
• 657 Inis Beag which might benefit the population as a whole, an opposition which
198 explains his support of political party and church—both conservative forces. It is asserted that, just as the government wants to preserve the Gaelic language and supposed Celtic virtues of the folk and the church their strength of belief and morality and thus underwrite the *status quo*, the senior publican wants no changes which might threaten his economic position and control over the lives of the islanders. To this end, he is thought to use his influence with priests and politicians who are in a position to modify local conditions.

184 Absent from Inis Beag is the evening *cuaird* of old men, which plays such
573 a decisive role in the political and social life of villages on the mainland. It is a
887 clique of visitors who usually convene at a particular home, called the "old men's house," to formulate local policies.

626 Much of the community's relation to the outer world is debated here and deter-
573 mined by the old men's agreement.... It is here that petitions for roads, for relief work in winter, for extension of agricultural prize schemes, and all of the "political" business of the county council and its committees originates on the side of the local community. It is here too that the community reaches its unanimity in party voting.... Here it is too that the community makes its appraisal of its own members and those with whom it is in contact. And that appraisal tells quite heavily in the behavior the community will adopt toward the person or

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

conditions appraised The community regulates its internal affairs through the *cuaird* as well It is here public opinion is formulated There is nothing formal about the decisions made upon the incidents arising from day to day The local community has no implement with which to enforce its will But it has the power of gossip and boycott (Arensberg and Kimball 1940:190–191)

Decisions of this sort and their sanctions in Inis Beag rest largely in the hands of government officials and the priest, headmaster, and king

Many folk long have believed that the island needs a council with representatives from each of the four villages serving on it, to foster cooperation and to formulate policies which bear on the welfare of all. After independence in 1922, a move was made to form such a council, but the civil war interrupted the process; since that time, according to the islanders, the opposition of curates and king, none of whom have wanted their vested interests threatened, has succeeded in blocking the formation of such a body. Other forces at work, however, are the lassitude and ambivalence toward authority of the people, and their dislike and jealousy of one another. They complain of the lack of leadership, or of the "wrong" kind of leadership, as in the case of the priest and king; but they are unable or unwilling to expend the energy needed to get themselves organized and "pull together" for the common good. Often those who advocate the formation of a council will, in the next breath, express their dislike or distrust of its potential members, or a desire to remain independent of its collective will should it run contrary to their own. A vacationing emigrant who said, "We have no sense of civic pride and responsibility but think only of ourselves.", assessed the situation accurately.

Among the traits attributed to Inis Beag folk by nativists and primitivists are self-reliance, independence, and individualism. But the self-reliance of the islanders has become undermined increasingly since 1891 by a benevolent government; their independence is severely curtailed by restrictions imposed on them by curate, headmaster, king, and their fellows; and their individualism is a figment of literary imagination disguising a strict conformism. Inis Beag as much as any community is characterized by gossip, ridicule, and opprobrium, which gain their effectiveness as social control mechanisms from the deep concern of the folk with "saving face," and which serve to limit freedom of action and behavioral idiosyncracy. When asked to rank the major deficiencies of island life, the people almost without exception place the prevalence of malicious gossiping, along with poverty and the intrusion of the clergy into secular affairs, at the head of their list.

No matter how much the islanders detest gossiping when they are its victims, they nevertheless welcome every opportunity to engage in it. News of an event passes quickly by word of mouth from Low to Terrace Villages, and variations in the description of the event are usually numerous due to the distortions of rumor. In order to circumvent gossip, parties are organized at the last moment and invitations issued by small boys moving quietly from door to door in the night; persons will leave the island—sometimes to emigrate, visit the hospital with a serious illness, or enter an order—without previous announcement, running from their homes to the strand to board the last canoes for the steamer; and mail is posted just prior to the arrival of the steamer and picked up immediately after it

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

582 621 593 three sisters, and ten of two—and they tend to visit together often and lend mutual economic and emotional support.

591 428 312 822 776 When a man marries, his parents relinquish the holding, and its direction passes into the hands of the newlyweds. Arensberg and Kimball talk of the "west room" complex, which may exist in many parts of peasant Ireland but does not in Inis Beag. Houses in north and west Co. Clare "with remarkable uniformity" are aligned east and west, and on the son's marriage the old couple moves into the westernmost room "behind the hearth." This room is linked with the Celtic supernatural, for fairy paths are thought to be located along the western side of many houses, and the pagan afterworld—the Isle of the Blest—is a sunken land mass in the nearby western sea (Arensberg and Kimball 1940:134–136). In Inis Beag, on the contrary, over one-third of the domiciles since 1841 have been aligned north and south, fairy trails are found mostly at the back of the island, and a retiring couple may choose any of three rooms (or more in modern homes) to move into. The west room of Co. Clare is called simply "the room" in Inis Beag.

342 [178] [177] [65] Thirty-four of the 71 inhabited buildings in the island have thatched roofs (see Fig. 8), while the others are antiquated houses which lately have been renovated, mainly by replacing thatch with slate, or are newly built. The last of the traditional "cabins" or "cottages" were constructed in the 1930s, and the first of the modern ones during the 1890s—with two stories initially, and styled and subsidized by the Congested Districts Board. Old and renovated houses are rectangular in shape, are constructed of whitewashed stones with concrete floors, and have a large central kitchen with doors or half-doors to the outside both front and back. "The room" is beyond the kitchen at one end of the building, and two bedrooms (one in the most ancient cabins) are at the other. Lofts for sleeping are in the gable of the roof above "the room" and bedrooms, and are entered by ladder [372] or staircase from the kitchen. Fireplaces share a common wall and chimney between the kitchen and "the room," as they also may between the two bedrooms; but the kitchen hearth is the most used, and in some homes is not permitted to die out.

351 [343] [244] The space between the cottage and the low stone wall and outbuildings surrounding it is called the "street." Outbuildings at the back include a toilet and various storage sheds—for spuds and turf sods in particular, although the latter often are stacked instead against a gable of the cabin. In a portion of the street or a small field beyond the wall, a garden for vegetables is maintained for easy access.

342 [262] [264] [415] [118] [352] The kitchen doors of the house sometimes open into small halls in the front or back, or both, and when the weather is not too cold or blustery, the door opening to the street on the windward side is kept closed and its opposite open. In the kitchen, which is the center of family activities, are: the fireplace at which cooking is done with pot and cooking ovens hung from an iron hook; the table around which the family eats their five daily meals; the sideboard, known as a "dresser," filled with "delph"—both everyday and "best" china; the religious shrine with "blessed lamp" surrounded by religious pictures and sacred objects; and, occasionally, a "settlebed" which, when closed, serves as a bench during the daytime.

354 [352] [616] [593] [178] The hearth in the kitchen is indented into the wall to provide two hobs, or seats, and on a chilly or dampish day the folk will nestle inside the fireplace and sit tightly together on a bench drawn up close to the turf fire for warmth. This

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

women in the island and are attracted by what they consider to be a more rewarding life on the mainland and abroad, and so emigrate for these reasons. One of the most "pitied" girls in the island is a returned emigrant to the United States, who, despite being 24 years of age and suitable for marriage in every way, is not being courted, although it is known that she came back to Inis Beag to obtain a husband.

All of the conditions making for personality depression—the intrusion of priests into secular affairs, hypochondria, malicious gossiping, poverty, boredom, and isolation—also instigate emigration. My analysis assigns the secular excesses of the clergy and their implementation of the Jansenist doctrines of the Catholic Church in Ireland as the primary push factors in emigration and supports the contention made by Paul Blanshard that, "When all the reasons for a flight from Ireland have been mentioned, there still remains a suspicion that Irish young people are leaving their nation largely because it is a poor place in which to be happy and free. Have the priests created a civilization in which the chief values of youth and love are subordinate to Catholic discipline?" (Blanshard 1954:154). What "remains a suspicion" to Blanshard as regards all of Ireland is very much a reality in Inis Beag.

Other internal factors accounting for emigration which are considered i.. ortant by the folk are the deadening of initiative by government services and subsidies and the institutionalization of emigration itself. While many islanders believe that the government ought to support even further the local economy in order to combat emigration, others feel that its present level of benevolence has had a deleterious effect on their character. Young people observing the indolence of their elders, according to this opinion, are shamed into seeking a more active life away from Inis Beag. In my estimation, this is a superficial cause, but the institutionalization of emigration is a vital factor, more recognized by youth than by their parents. Just as in the case of late marriage, emigration since famine times gradually has become an expectation—a "way of life"—and it will stimulate some folk to leave even though, in the estimation of their fellows, it might be advantageous for them to remain. When a young man says that he has an "itch to go to England and work for a spell," he usually is being motivated in this manner.

Among the external causes of emigration, the most significant are the growth of prosperity on the mainland and abroad, the influence of ever increasing numbers of tourists who visit and returned emigrants who come for short stays or to retire in Inis Beag, the impact of the mass media of communication, and the increasing availability of scholarship funds for children to attend secondary schools on the mainland. The United States has been a land of freedom, opportunity, and prosperity to the Irish since the early seventeenth century, but particularly during and after the famine (Approximately 1,000,000 Irish emigrated between 1846 and 1851, and another 1,500,000 perished from hunger, according to Woodham-Smith 1962:411.). The first record of substantial emigration from Inis Beag is in 1822, and from that time until the Second World War most islanders migrated to the United States, never to return. However, with the growth of prosperity in England after 1946, the stream of emigration shifted in that direction. Not only did jobs become plentiful across the Irish Sea then, but large, viable ethnic communities served by Irish clergy had sprung up in the larger cities. It became possi-

16:Messenger E-4,5 (1955-1966) 1969 ER6 Rural Irish ER6
(1959-1960) Inis Beag

teachers, whose influence and attention earn for the children of these families the greater share of scholarship funds.

Not only has education abroad been a major pull factor in emigration, but local education as well in the form of a summer language school for mainland children, which was established in 1960 and has convened for two months each year ever since. Over a hundred students—in two shifts of a month apiece—attend the school, where in addition to learning Irish formally and speaking it in the homes where they are lodged, they are instructed in singing, playing musical instruments, and set dancing in the traditional mold. Monies from Gaeltacht Eireann support the director from the mainland and the Inis Beag headmaster who teach, a skilled musician who provides music for dancing and also instructs, and the students. Eight hundred pounds were channeled into the local economy in 1960 by this nativistic endeavor hopefully aimed at propagating Gaelic and halting emigration. The influence of the visiting children, who interact with their island counterparts at home and at outdoor dances each evening, is considerable; the outsiders tend to be critical of conditions in Inis Beag and boast of the superiority in every dimension of life on the mainland. It is questionable whether the school has diminished the push effect of emigration by enlivening the social atmosphere of the island as much as it has increased the pull effect by creating even more discontent among young people. There are those who denounce the language school on the grounds that the visiting children speak more English than Irish in the local homes; that many islanders in their greed for profit do not provide adequately for the students assigned to them; and that some of the mainlanders are openly promiscuous and thus subvert the morality of Inis Beag youths.

Since 1960, priests have become more realistic in their appraisal of the causes of emigration and have taken steps to enliven further the social milieu of the island. They have been responsible for introducing set dancing and tin whistle playing instruction in the national school, for organizing yearly athletic, canoe rowing, and dancing competitions between folk of Inis Beag and Inis Thiar, for building the dance hall to serve various purposes, and for setting up a small lending library of books in the school. The hall was built with a Gaeltacht Eireann grant, the free labor of island men, and money gifts solicited from interested parties all over the world. It resembles its predecessor—the boathouse on the strand built by the coast guard company—in that it functions as dance hall, trade school, storage house, and meeting place; but it is much larger and better constructed and has many more facilities than the latter. The folk view it as a mixed blessing, for they disliked building it without being paid wages, and feel now that it is not available to them enough of the time, and when it is, they are charged by the curate to attend dances and view television. Many believe that church and government should have provided wages to the builders to compensate for farming and other time lost, and that "the key of the hall shouldn't be in the priest's pocket." Since its completion, the building has accommodated most of the activities of the language school.

In contrast to the islanders who are deeply committed to the local culture and fear that Inis Beag will become depopulated within the next generation, there

17: Messenger E-4,5 (1958-1966)1971 ER6 Rural Irish ER6
Inis Beag

the major source of their livelihood; production is mainly for subsistence and is carried on with a simple technology, using the digging stick, spade, and scythe as primary implements; the island folk participate in a money economy, but barter still persists; a low standard of living prevails, and the birth rate is high; the family is of central importance, and marriage figures prominently as a provision of economic welfare; the island is integrated into the county and national governments and is subject to their laws; the people have long been exposed to urban influences and have borrowed cultural forms from other rural areas on the mainland, integrating them into a relatively stable system; and, finally, the experience of living under English rule for centuries has created in the islanders an attitude of dependence on—yet hostility toward—government which continues to this day. The only conditions in Inis Beag which run counter to those found in most other peasant communities are low death and illiteracy rates and bilateral, rather than unilineal, descent (although inheritance is patrilineal).

Inis Beag culture also characterizes people of nearby islands, and the traditions of the several together might be regarded as forming a subculture of the total Irish system. Many island customs are shared with rural peasants on the mainland (where numerous regional subcultures exist), and some are part of a broader European matrix. The island has experienced considerable cultural change since the establishment of the Congested Districts Board (forerunner of the Gaeltacht) in 1891 and the growth of tourism in this century. But conditions there still approximate those which must have prevailed two generations ago, and earlier, throughout this region of peasant Ireland.

Inis Beag has a population of approximately 350 persons living in seventy-one "cottages" distributed among four settlements, called "villages." Bordering a "strand" and a large tract of common land on the northeastern side of the island are a series of limestone terraces, separated by water-bearing shales and faced by small cliffs, on which the villages are situated. Most of the arable land is found on this side, where the shales have been broken down by weathering and alien soils deposited by wind and by ice of the Weichsel glacier. Over many generations, the islanders have deepened these soils and created new soils on rock surfaces by adding seaweed, sand, and human manure. On the southwestern side of Inis Beag, known as the "back of the island," limestone pavements slope rather evenly, almost as the gentle dip of the strata, from the crest of the highest terrace to the sea a mile away. The bared surfaces are intersected in all directions by crevices,

433
434
226 months; less than a dozen crews now fish regularly, and most fish are consumed locally rather than exported. Government subsidies of many
434 sorts and remittances from relatives who have emigrated supplement the
657 cash economy. The government further aids the islanders by not collect-
[651] ing "rates" and by setting low rents on land. Income information is as
12 difficult to come by as data on sex, disputes, and pagan religious retentions; since the people do not wish to jeopardize their unemployment benefits (most of them receive the "dole") and old age pensions and fear taxation in the future, they are secretive about sources and amounts of income.

626 More important than the formal political structure of Inis Beag are the local informal system and social control techniques of gossip,
674 ridicule, satire, and the like. Crime is rare in Inis Beag, and there are no "guards" stationed there. The island is seldom visited by politicians,
829 and many inhabitants are either apathetic or antagonistic toward the
641 county and national governments. Those asked to account for their
[66] antigovernment attitude cite widespread nepotism and corruption among officials, the slight differences between the platforms of the two major parties, and "foolish" government schemes in Inis Beag—usually instituted without consulting the islanders. Government aid is sought and
[657] even expected as a "right," but it is seldom considered adequate. Tax-
[746] ation in any form, especially of tobacco and stout, is bitterly opposed.

626 The informal political system is dominated by the curate, the
793 "headmaster" of the national school, and a self-appointed local "king."
[875] In the past, the amount of influence exerted by curates has varied; some
[624] have been concerned mostly with fulfilling spiritual responsibilities, while others have attacked by sermon, threat, and even physical action such activities as courting, dancing, visiting, gossiping, and drinking
793 spirits: Anticlerical sentiment (seldom manifested in overt acts) is as
829 strong as, or stronger than, its antigovernment counterpart. The clergy are said to interfere too much in secular affairs, to live too "comfortably," to be absent from the island too often, and to act overly aloof and
[626] supercilious. The most outspoken anticlerics assert that curates have employed informers, allocated indulgences, withheld the sacraments, and placed curses ("reading the Bible at") in their efforts to regulate the
875 secular life of Inis Beag. The headmaster, appointed and rigidly super-
571 vised by the parish priest and curate, presides over social events and serves as an adviser to the islanders in many matters, in addition to carrying out his official duties.

571 Inis Beag lacks a class system, and the status symbols which affect

17: Messenger E-4,5 (1958-1966)1971 ER6 Rural Irish ER6
Inis Beag

appears, however, that this argument is usually used as a rationalization for late marriage, when other causal factors are, in reality, responsible—certainly when "considering" covers two or more decades!

The population of Inis Beag has dropped from a high of 532 persons in 1861 (up 76 from the prefamine census a decade earlier) to 497 in 1881, 483 in 1901, 409 in 1926, 376 in 1956, and 350 when my wife and I were there two years later. Today, there is grave concern over the future of the island, and some folk hold that within another generation or two Inis Beag will have gone the way of the Blasket Islands. Although my wife and I isolated almost two dozen causes for the phenomena of late marriage and celibacy, over thirty interrelated causes pertain to emigration (many of those at work in the marital sphere also stimulate emigration). Once again, I will address only the principal causes and stress the role of sexual repression, dealing first with internal factors and then external ones promoting emigration.

Among internal causes, the previously considered inheritance pattern, parents who want to maintain the family status quo for various reasons, and the girls' and young women's increasing dissatisfaction with their lot figure as prominently in the emigration picture as the marital. Some Inis Beag men claim that the reason male youths are leaving the island is economic depression, caused by the collapse of kelp-making and the fishing industry. But this cause is untenable when one examines the increase in government subsidies, remittances from relatives abroad, and taxation and land rental policies; these have far more than made up for the loss of previous revenue. Real income has increased substantially, despite recent inflation, and young men are very much aware of this fact. Just as late marriage has become institutionalized over the past century, so has emigration since the first large-scale migration of islanders in 1822. Emigration is a way of life, which will stimulate some folk to leave in spite of other conditions which might lead an observer to advise their remaining.

By far the most important reason for Inis Beag's long dwindling population is the total cultural impact of sexual puritanism and the secular "excesses" of the clergy. Blanshard writes, "When all the reasons for a flight from Ireland have been mentioned, there still remains a suspicion that Irish young people are leaving their nation largely because it is a poor place in which to be happy and free. Have the priests created a civilization in which the chief values of youth and love are subordinate to Catholic discipline?" (Blanshard 1954: 154). What "remains a suspicion" to Blanshard is fully confirmed by a wealth of data from Inis
